Whether you're hittin' the weight bench, the elliptical, or the mat, there's nothing like the right music to push you through your workout. And we say, you can't go wrong with a good regimen of bass-laden bangers for the occasion. This hip-hop workout mix will get the hype job done so you can get the gains. Be sure to follow us on Spotify and keep this playlist locked for the next time you're going in on your glutes. Here's the set list: So, you've found a few songs or a great playlist on Spotify, but you'd like to listen to them offline. Luckily, Spotify has a way for you to download your favorite songs so you can enjoy them whenever you want. Contents PrerequisitesDesktopMobileTroubleshooting Before you become too excited, you'll need a couple of things first: A device to store the songs on, an internet connection, and a Spotify Premium subscription. Prerequisites Spotify is a bit picky about what it lets you download on certain devices, so here's a quick summary: On a desktop, you can save your liked songs and playlists for offline listening, but — unlike on mobile — albums and playlists are out of the equation. Desktop How to download liked songs on desktop Downloading your entire catalog of liked songs on a computer couldn't be easier — just open up the Liked Songs section of Spotify (using the Spotify application for MacOS or Windows) and flick the Download switch. That's all there is to it. How to download playlists on desktop Step 1: When viewing a curated playlist you'd like to download, click the little heart-shaped icon, which is located directly to the right of the Play button, to save it to your library for easy access. (If you don't, the download option will remain hidden.) Step 2: Next, toggle the Download slider in the upper-right corner of any playlist. The playlist will begin downloading, but keep in mind that it may take a little while depending on the size of the playlist and the speed of your internet connection. Once saved, the playlist will be accessible from within the "Playlists" section on the left-hand side of the Spotify application for MacOS and Windows, alongside all your other playlists (even those not downloaded for offline listening). Mobile How to download Liked Songs playlist, an album, or a playlist on mobile Whether you're downloading your Liked Songs playlist, an album, or a playlist, the procedure is the same across the board. Just load up the collection you want to save and tap the Download switch in the upper-right corner. The tracks will then start downloading. Note: You don't have to be following a playlist or an album to download it on your mobile device. How to download a podcast on mobile Step 1: While watching a podcast (such as Trends with Benefits), you'll see three dots in the upper right-hand corner of the screen. If you have an Android, you'll see three vertical dots. Click these dots, and you'll be directed to the information menu. Step 2: From here, tap Manage Downloads. Step 3: You'll see a download icon next to each episode, which lets you pick which episode you want to download. Note: If you're looking for a faster process, you can also click the three horizontal (or vertical) dots located right beside each episode. All you need to do now is click Download. Troubleshooting If it's not allowing you to download more songs, it may be because you've reached the irritating 3,333-songs-per-device limit. If this is the reason, try deleting a playlist from your offline library. This can help you make additional space for the songs you want to download. We also want to remind you that you can only download on three devices simultaneously. It simply won't work if you attempt to download more. If you try to do this with no luck, you can turn around and disable offline listening on one of your other devices. Editors' Recommendations "Sundowning" by Sleep Token downloaded in Spotify (Image credit: Hayato Huseman / Android Central) One of Spotify's best features for Premium members is the ability to save local copies of albums and playlists for offline playback. This is a great way to cut back on your monthly data usage, and of course, it lets you listen to your favorite songs without a data connection, which is particularly useful for frequent travelers. Unfortunately, Spotify doesn't make it immediately obvious how to find your locally stored music, so we're here to help.Products used in this guidePure Google. musicDownloading music for offline use is easy, but you have to do it at the top of each album or playlist. Here's how to enable repeat. We happen to be using an iPhone here, but it's the same on Android. Open the Spotify app on iPhone. Play the song you want to listen to on repeat. It can be an individual track or part of a playlist. Tap once on the Now Playing bar to maximize the album art and the playback controls. Tap the Repeat button once to turn it green. It will enable the playlist to play on repeat. Tap the Repeat button twice in succession to turn it green and display a small "1". It will loop the song on repeat till you turn it off. Tap it again to stop the song playing on repeat. To repeat a selected bunch of favorite songs on Spotify (and not the entire playlist), just create a new playlist with your selections and repeat this playlist. The Repeat feature is available on the Android and iOS apps for Spotify Premium account users. Though, you can use the repeat feature on free accounts if you're listening to Spotify on a desktop computer. Remember, to access the Enable Repeat button; you have to display the song in a full window by tapping on the Now Playing bar. To repeat a song without a Premium account, open the Spotify player on the desktop to listen to your favorite tracks. FAQ How do I put a song on repeat using the Spotify web player? Launch the Spotify web player and locate the song you want to put on repeat. Play the song, and then find the Repeat button in the media controls. Press the Repeat button twice; it will turn green and display a 1. Press the Repeat button again to stop repeating the song. How do I put a podcast on repeat with Spotify? Unfortunately, you can't put a podcast on repeat with Spotify. As a workaround to mimic the loop feature, add the podcast to your queue so it will replay when it's finished. How do I make a playlist repeat on Spotify? To repeat an album or playlist on Spotify, begin playing it, and press the Repeat button once. The Repeat button will turn green, but it won't display a 1 as if you pressed the button twice. The playlist or album will play through and then begin playing again. If you press the Repeat button twice and it displays a 1, the current song will play on a loop. Thanks for letting us know! Get the Latest Tech News Delivered Every Day Subscribe Tell us why!
